

Now Available!

Custom QR Code Marketing Materials

With our new print on demand service, order free, customized CareCredit marketing materials which include your practice or business name and your location's custom link and QR code!

When you share your custom link and QR code, it makes it easy for your patients or clients to learn about and see if they prequalify for the CareCredit credit card, and pay their bill—all on their own device. This allows your team to offer financing options without taking time away from care-focused conversations.

What materials can be customized with my custom link and QR code?

SIGNAGE

Place this at your front desk or throughout your location. With this signage, you no longer need a separate acrylic stand.

BROCHURES

Place these next to your QR code signage or in your brochure rack.

STICKERS

Include these on statements, appointment reminders, mailings, and more.

There is no charge for these resources, but the quantities are limited. You can continue to order or download other ready-to-use marketing materials in Provider Center as well.

How it Works

- 1** **VISIT** carecredit.com/ordersupplies and log in to Provider Center.
- 2** **SELECT** Print On Demand: QR code marketing materials.
- 3** **CHOOSE** which piece(s) you'd like to send to print and follow the steps, indicating your order quantity and verifying your shipping address.
- 4** **REVIEW** the proof.
- 5** **SUBMIT** You'll receive a confirmation email when your order has been received and shipped.

Order your customized marketing materials today!

Prominently display your customized materials and help your patients or clients move forward with the care they want or need.
